

UNITED STATES DEPARTMENT OF AGRICULTURE

DIRECTOR OF EXTENSION WORK

WASHINGTON, D. C.

Circular Letter
Soil Conservation Service - No. 4.

TO STATE EXTENSION DIRECTORS:

Re: County Programs in Erosion Control.

In reply to Erosion Control Circular Letter No. 1 dated April 27, State Extension Services, conducting county soil improvement programs with the aid of funds from various Government agencies, have supplied this office with information concerning these activities. However, additional up-to-date information is now desirable.

The Soil Conservation Service is desirous of cooperating wherever possible. The enclosed brief questionnaire when properly filled out and returned to this office, will aid the Soil Conservation Service in coming to some decision as to what it may contribute. Reports on these forms are desired only from those counties which have been aided by funds from your State relief or rehabilitation organizations for the employment of an assistant county agent to conduct a soil improvement program, or with funds from any public agency or farmers' association for the purchase of terracing equipment in connection with a rural rehabilitation program.

Information is not requested concerning such developments cooperative with the Tennessee Valley Authority or with the work of Civilian Conservation Corps camps, as the continuation of these is not in question.

Early return of the questionnaires will be greatly appreciated. A sufficient number of copies of the letter and questionnaire is being sent to you for forwarding by you to the agents in counties in which this work is under way.

Yours very truly,

C. W. Warburton,
Director of Extension Work.
